Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to methods of identifying modulators of human Cardiac related Ankyrin Repeat protein Kinase (CARK), SEQ ID NO:2, classified in class 435, subclass 15.
- II. Claims 1-12, drawn to methods of identifying modulators of rat Cardiac related Ankyrin Repeat protein Kinase (CARK), SEQ ID NO:8, classified in class 435, subclass 15.

The inventions of Groups I and II are patentably distinct because each invention has different steps and different end-points.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Ms. Jean Silveri on 5/17/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1652

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
